## WORLD-CLASS POWDER FORGING FOR HIGH PERFORMANCE PRODUCTS

- ✓ Customizable, compact & lightweight designs with hardness tailored to application
- ✓ Optimized and efficient designs & performance
- ✓ High purity powder alloys for higher safety margin mechanical properties
- ✓ Achieve complex features with high density requirements
- ✓ Sustainable manufacturing targeting 100% material utilization
- ✓ Net shape forged features provide excellent capabilities & waste reduction

### INDUSTRY

BEV/  
Automotive Transmission

### TECHNOLOGY

PM Forging

### MATERIAL

High Strength PM Steels

GKN SINTER METALS
